 ADDED PHYSICAL LAYER NAME TO PRINTS 2

ITEMS FIXED SINCE V23.3..... 3

New Features

Added Physical layer name to Prints

Adding a Footer to the printout now allows the Physical layer Name, Type and Side to be added to the printout, making identification easier.

Items Fixed since v23.3

This list is customer reported issues fixed for this release.

#415 Fixed an inconsistency in the display of selected polygons.

#412 Added the Layer name to printouts when the Footer option is chosen.

#411 REP files (and other aperture list formats) are now auto-recognized during Import.

#404 Fixed an issue caused by spaces in the aperture macro definition not being ignored. Caused by a side effect of work in the v15.2 release.

#386 The result of copy and paste action for a specific polygon construction was incorrect. Now correctly breaking polygon chains where applicable.

#385 Gerber file was using illegal oblong aperture to draw a trace. This issue is now error trapped and reported to the user.
