New Features

Items Fixed since v24.1

This list is customer reported issues fixed for this release.

#439 Updated the End of subscription message box to give clearer information regarding possible options for updating software.

#435 Layer offset value was adversely affecting the results of Filter Inside function. This issue has been fixed.

#433 Removed the link to Stackup Materials Database in the File Locations tab to eliminate unnecessary warnings.

#432 Certain PC settings were leading to some dialog text not displaying fully. Changed the font being used so that the size is dynamically generated.

#414 Updated the Refresh behavior to better identify polygon chains that have been selected graphically. The specific area of confusion was when the option to select the entire polygon chain based upon one segment was set to TRUE.
