New Features

Items Fixed since v25.1

This list is customer reported issues fixed for this release.

- #525 Very shallow arc became a straight line in the 64bit build of the application. Fixed.
- #523 Added a list of option to the Options Tab under the Help > About dialog.
- #522 The application now releases Gerber files once New Job has been run. The Gerber files are locked to ensure Reloading of a file is consistent but previously the file remained locked until the software was closed.
- #519 Updated the Status bar to smoothly should progress. Previously the status bar was difficult to read due to flickering.
